

CAVE

Product manufactured  
in France

BREATHE DEEPLY  
IN YOUR BASEMENT  
AGAIN!

33%

1 out of 3 (33%) homes  
face damp problems

One out of three homes face damp problems. **Basements** are primarily affected. If no action is taken, **dry rot, a dangerous fungus, could spread in dark and damp areas.**

Unfortunately, simply creating openings in the lower parts of the house is not enough. **Air flow must be artificially driven to flush out the humidity.** The VMI® Cave unit is especially designed for this purpose. **Store your belongings without worrying about damage from damp.**

CAVE

THE VMI® SYSTEM CAN  
BREATHE NEW LIFE INTO  
YOUR BASEMENT.

Our engineers developed the VMI® Cave system to fight the damp and mould problems, which frequently arise in basements. A VMI® system dedicated to cellars, basements and garages.

### HOW CAN THIS SYSTEM NOT PLEASE?

- 5-year warranty.
- Designed and manufactured in France.
- Standalone operation.
- Suitable for all basements, big or small.

### EASY TO INSTALL.

- Easy to install thanks to its reasonable size .  
(L. 32.5 cm x W. 25 cm x H. 30.6 cm)
- All that is required is a power supply, an outdoor air inlet and an air outlet.

### STOP RADON

Thanks to positive input ventilation, the VMI® Cave system can prevent **radon build-up** in your basement.

### HEALTHY AIR

The VMI® Cave system can protect you from **outdoor pollution** thanks to its filter while **removing stale air**.
